ACKNOWLEDGEMENTS

1. General Introduction	1-13
2. Materials and Methods	14-20
A. Myrtales – Chemotaxonomy	
3. Chemotaxonomical studies on some members of the Myrtaceae	21-28
4. Chemotaxonomical studies on some members of the Combretaceae	29- 34
5. Chemotaxonomical studies on some members of the Lythraceae	35-39
6. Chemotaxonomical studies on some members of the Melastomataceae	40-44
7. Chemotaxonomical studies on some members of the Rhizophoraceae	45-49
8. Chemotaxonomical studies on some members of the Punicaceae, Onagraceae, Lecythidaceae and Alangiaceae	50-57
9. General Discussion on chemotaxonomy of Myrtales	58- 65
B. Myrtales – Medicinal Plants	
10. Medicinal plants: need for detailed studies.	66- 82
11. Medicinal plants of the Myrtaceae: <i>Psidium</i> (1), <i>Pimenta</i> (1) and <i>Syzygium</i> (1)	83- 105
12. Medicinal plants of Combretaceae: <i>Terminalia</i> (2) and <i>Combretum</i> (1)	106- 138
13. Medicinal plants of the Lythraceae: <i>Ammania</i> (1), <i>Lagerstroemia</i> (1), <i>Lawsonia</i> (1) and <i>Woodfordia</i> (1)	139- 170
14. Medicinal plants of the Onagraceae, Alangiaceae and Melastomataceae and Lecythidaceae: <i>Ludwigia</i> (1), <i>Alangium</i> (1), <i>Melastoma</i> (1), <i>Barringtonia</i> (1) and <i>Careya</i> (1).	172-213
15. General discussion on medicinal plants studied	214-220
16. Summary and Highlights	221-229
References	230-243
Appendix
