

## **Acknowledgements**

I am highly indebted to The Almighty for bestowing his abundant blessings upon me throughout my doctoral journey. His presence at all times gave me courage and strength to move ahead continuously in life amidst all odds. His guidance, the foremost in my life, has always seen me through all difficulties and paved way to my final destination. I pray to the Almighty to continue showering His benevolence on me for all times.

Guidance, help, support, encouragement and motivation of many have made this thesis a reality and I take this opportunity to express my gratitude towards all of them.

I would like to express my sincere thanks to my guide, Dr.K.D.Vachhrajani for his understanding and support that have helped me shape the present thesis. His implicit faith has contributed largely in the successful completion of the work. I hope to receive such support in future as well.

I am thankful to The Almighty once again for providing me the opportunity to get nurtured under the unconditional guidance of Prof A.V. Ramachandran. I express my deep and sincere gratitude towards him. His perpetual energy and enthusiasm in research has motivated all his advisees including me. His limitless support and encouragement have guided me through my doctoral work, which had dawned from the

time I started my M.Sc dissertation under his guidance. His scholastic attitude towards new challenges in life and spiritual knowledge has always been a source of constant inspiration to me.

I am grateful to (Late) Prof. M. V. Asnani for help rendered by her and Dr P. C. Mankodi for his support and encouragement throughout my thesis work.

I would like to acknowledge UGC for research fellowship provided under RFSMS scheme and Dr. Geeta Padate, Head, Department of Zoology for providing necessary facilities for the completion of my investigations.

I feel highly obliged to thank Prof. T. G. Shrivastav, NIHF, New Delhi for his generous gift of kits and guidance in the execution of hormone assays in his lab by providing facilities to carry out that part of my work successfully. I would also like to thank his lab members Kiran Rangari and Suman kumar for their co operation and help.

I would like to acknowledge Dr. Sunil Shah, Dr Sunil's Laboratory Baroda and his staff for their co operation and help rendered for the various clinical investigations. I would also like to thank Dr.G.J.Rindani for his help and guidance in this part of my thesis.

I am grateful to Prof. Sarita Gupta Head, Department of Biochemistry for the facilities provided for the neonatal work set up and approval.

I owe special thanks to my senior Dr. Prem Kumar Singh whose support, guidance, encouragement and critics have made me learn all the practical aspects of my work. His co-operation and understanding have been an essential part of my research experience from M.Sc till date. Without his constant backing it would not have been possible for me to achieve any of the credentials that I have achieved today.

A special thanks for my friend Nayruti for her constant support and co-operation throughout my research work. She was always by my side in all the good and bad times and I thank her for being there.

I would like to thank my senior Ansar for his help in few of the practical aspects and Dr. Raktim, Dr. Sudip, Dr. Niraj, Dr.Sonal, and Dr. Jagruti for all their support and encouragement rendered during the entire tenure of my research work. The memorable moments spent by all of us in the lab will always be cherished.

I would like to also thank Prashant, Saba and Suneeva for their encouragement and Radhika, Varsha and Mayur for their help and support in my practical work.

I also thank my lab mates Nirjara, Kiran, Chandni for all their support and help whenever it was required. I also thank Ravi, Menaka and Anita for their support and my juniors Dipak, Swati, Sandhya and Jaimesh for their help in the lab. I thank them all for their support and encouragement.

I wish to thank the former M.Sc students Ankita, Ruchi, and Kavita for their help during my thesis writing and Sunny, Isha, Palak, Minaxi, Jatin, Mohsin, Vineeta, Sumedha, Avni, Anjali and Ankita for their help whenever it was required and wish them good luck for their future.

I also take this opportunity to thank Prof Veena Mistry, Dr. Mandira Sikdar, Dr Elizabeth, Mr.Santhosh, Ms Shaheen, Ms.Shilpa, Ms.Leena and Ms Pramila my seniors at the Navrachana University for their encouragement during the thesis writing and also for their co operation in times when I had to excuse from certain activities due to my thesis writing. I also thank Ms.Promila Zalpuri , Principal, Baroda High School for being the foundation support during my initial research phase.

I also thank the non teaching staff and peons of the department for their help during this period.

My deepest gratitude goes to my family for their unflinching love and support throughout my work. My grandparents and parents for their motivation and support despite the toughest of situation at home and I dedicate my thesis to them. I would like to thank my younger brother Aaditya for his support and criticism that have helped push my thesis to its completion. I thank him for taking up duties at home in my absence and also taking care of Dadi and helping my mother in her work. Support from all other family members, Arpan and Sanjana has constantly been the backbone for speeding up my work.

**The constant and unfailing support of all has made me reach this important day in my life. I take a pledge that all the sacrifices done by my animals will be used for gaining better knowledge for the mankind and thereby I pray to god to forgive me for my mistakes and once again thank one and all for all their help and support.**
