

List of Tables

Table 1-1: Evolution of definition of ‘Entrepreneur’	10
Table 2-1: Comparison of antecedents of entrepreneurial intention in various Entrepreneurial Intention Models	60
Table 3-1: Evolution of early self-efficacy scales	88
Table 3-2: Evolution and evaluation of prominent ESE scales	96
Table 4-1: Source of different items considered for development of ESE scale	122
Table 4-2: Demographic profile of the sample in pilot study	124
Table 4-3: Reliability scores of ESE scale in pilot study.....	126
Table 4-4: KMO and Bartlett's Test result for Pilot study	127
Table 4-5: Eigen values and variance from Factor analysis-Pilot study.....	129
Table 4-6: Rotated Factor Matrix using Varimax Rotation-Pilot study	129
Table 4-7: Structure of final questionnaire	131
Table 4-8: Sample Size	136
Table 4-9: Demographic profile of the sample	138
Table 4-10: KMO and Bartlett's Test result for research instrument.....	143
Table 4-11: Rotated Factor Matrix using Varimax Rotation	144
Table 4-12: Eigen values and variance explained through Factor analysis	146
Table 4-13: Structure of final questionnaire	146
Table 4-14: Cronbach alpha for each factor of ESE and over-all ESE.....	147
Table 5-1: Normality Test for ESE scores of EMBA graduates and prospects.....	150
Table 5-2: Homogeneity test and Independent sample t-test for ESE scores of EMBA graduates and prospects.....	150
Table 5-3: Descriptive statistics of ESE scores of EMBA graduates and prospects	150
Table 5-4: Box's Test of Equality of Covariance Matrices-EMBA graduates and prospects...	151
Table 5-5: Levene's Test of Equality of Error Variances -EMBA graduates and prospects	152
Table 5-6: Pearson Correlation between EMBA graduates and prospects’ Phase-wise ESE	152
Table 5-7: MANOVA- Phase-wise ESE venture -EMBA graduates and prospects	153
Table 5-8: Univariate Test Results – Phase-wise ESE of EMBA graduates and prospects	153
Table 5-9: Descriptive Statistics- Phase-wise ESE of EMBA graduates and prospects.....	154
Table 5-10: MANOVA- Task-wise ESE of EMBA graduates and prospects.....	154
Table 5-11: Univariate Test Results – Task-wise ESE of EMBA graduates and prospects.....	155
Table 5-12: Normality Test for ESE scores of EMBA and RMBA prospects	158
Table 5-13: Homogeneity test and Independent sample t-test for ESE scores of EMBA and RMBA prospects	158
Table 5-14: Descriptive statistics of ESE scores of EMBA and RMBA prospects.....	158
Table 5-15: Box's Test of Equality of Covariance Matrices - ESE of EMBA and RMBA prospects.....	159

Table 5-16: Levene's Test of Equality of Error Variances ^a -ESE of EMBA and RMBA prospects	159
Table 5-17: Pearson Correlation between EMBA and RMBA prospects' Phase-wise ESE	160
Table 5-18: MANOVA- Phase-wise ESE of EMBA and RMBA prospects	160
Table 5-19: Univariate Test results – Phase-wise ESE of EMBA and RMBA prospects	161
Table 5-20: Descriptive Statistics comparing ESE of EMBA and RMBA prospects	161
Table 5-21: MANOVA – Task-wise ESE of EMBA and RMBA prospects	162
Table 5-22: Univariate Test Results – Task-wise ESE of EMBA and RMBA prospects	162
Table 5-23: Normality Test for ESE scores of EMBA and RMBA graduates	165
Table 5-24: Homogeneity test and Independent sample t-test for ESE scores of EMBA and MBA graduates	166
Table 5-25: Descriptive statistics of ESE scores of EMBA and RMBA graduates	166
Table 5-26: Box's Test of Equality of Covariance Matrices - EMBA and RMBA graduates	167
Table 5-27: Levene's Test of Equality of Error Variances - EMBA and RMBA graduates	167
Table 5-28: Pearson Correlation between EMBA and RMBA graduates' Phase-wise ESE	167
Table 5-29: MANOVA-Phase-wise ESE of EMBA and RMBA graduates	168
Table 5-30: Univariate Test Results comparing ESE of EMBA and RMBA graduates	168
Table 5-31: Descriptive Statistics - Phase-wise ESE of EMBA and RMBA graduates	169
Table 5-32: MANOVA – Task-wise ESE of EMBA and RMBA graduates	169
Table 5-33: Univariate Test Results- Task-wise ESE of EMBA and RMBA graduates	170
Table 5-34: Searching phase Task-wise ESE comparison among EMBA and RMBA graduates; EMBA and RMBA prospects; EMBA graduates and prospects and RMBA graduates and prospects	173
Table 5-35: Analysis of ESE scores of EMBA and RMBA prospects and graduates-Searching phase tasks	173
Table 5-36: Planning phase Task-wise ESE comparison among EMBA and RMBA graduates, EMBA and RMBA prospects, EMBA graduates and prospects and RMBA graduates and prospects	175
Table 5-37: Analysis of ESE scores of EMBA and RMBA prospects and graduates- Planning phase tasks	176
Table 5-38: Marshalling phase Task-wise ESE comparison among EMBA and RMBA graduates, EMBA and RMBA prospects, EMBA graduates and prospects and RMBA graduates and prospects	177
Table 5-39: Analysis of ESE scores of EMBA and RMBA prospects and graduates- Marshalling phase tasks	178
Table 5-40: Marshalling phase Task-wise ESE comparison among EMBA and RMBA graduates, EMBA and RMBA prospects, EMBA graduates and prospects and RMBA graduates and prospects	180
Table 5-41: Analysis of ESE scores of EMBA and RMBA prospects and graduates- Implementing(people) phase tasks	181

Table 5-42: Implementing(finance) phase Task-wise ESE comparison among EMBA and RMBA graduates, EMBA and RMBA prospects, EMBA graduates and prospects and RMBA graduates and prospects	182
Table 5-43: Analysis of ESE scores of EMBA and RMBA prospects and graduates- Implementing(finance) phase tasks.....	182
Table 5-44: Implementing(IT) phase Task-wise ESE comparison among EMBA and RMBA graduates, EMBA and RMBA prospects, EMBA graduates and prospects and RMBA graduates and prospects	183
Table 5-45: Analysis of ESE scores of EMBA and RMBA prospects and graduates- Implementing(IT) phase tasks.....	184
Table 5-46: General ESE comparison among EMBA and RMBA graduates, EMBA and RMBA prospects, EMBA graduates and prospects and RMBA graduates and prospects ...	185
Table 5-47: Analysis of General ESE scores of EMBA and RMBA prospects and graduates ..	186
Table 5-48: ESE Comparison among all groups of respondents	189
Table 5-49: Descriptive statistics of ESE of EMBA prospects and graduates with respect to Gender	191
Table 5-50: Test of normality of ESE scores with respect to gender	192
Table 5-51: Levene's Test of homogeneity of variance of ESE with respect to gender	192
Table 5-52: Two-way Mixed Design ANOVA for gender and entrepreneurship education.....	192
Table 5-53: ANOVA: Difference in ESE based on gender for EMBA prospects and graduates	194
Table 5-54: ANOVA: Difference in ESE based on entrepreneurship education for male and female participants.....	195
Table 5-55: Descriptive statistics of ESE of EMBA prospects and graduates with respect to number of parents in business.....	196
Table 5-56: Test of normality of ESE scores with respect to number of parents involved in business	196
Table 5-57: Levene's Test of homogeneity of variance of ESE scores with respect number of parents involved in business	197
Table 5-58: Two way Mixed Design ANOVA results for entrepreneurship education and number of parents involved in business	197
Table 5-59: ANOVA : Difference in ESE based on number of parents involved in business for EMBA prospects and graduates.....	199
Table 5-60: ANOVA : Difference in ESE based on entrepreneurship education for varying number of parents involved in business.....	199
Table 5-61: Descriptive statistics of ESE of EMBA prospects and graduates with respect to involvement of father in business	201
Table 5-62: Test of normality of ESE scores with respect to father involved in business	202
Table 5-63: Levene's Test of homogeneity of variance of ESE scores with respect to involvement of father in business	202

Table 5-64: Two way Mixed Design ANOVA results for entrepreneurship education and involvement of father in business	202
Table 5-65: ANOVA : Difference in ESE based on involvement of father in business for EMBA prospects and graduates	204
Table 5-66: ANOVA : Difference in ESE based entrepreneurship education participants with and without involvement of fathers in business.....	205
Table 5-67: Descriptive statistics of ESE of EMBA prospects and graduates with respect to interaction with fathers about business	206
Table 5-68: ANOVA results for difference in ESE based on level of interaction with father about business	206
Table 5-69: Descriptive statistics of ESE of EMBA prospects and graduates with respect to involvement of mother in business	207
Table 5-70: Test of normality of ESE scores with respect to mother involved in business	208
Table 5-71: Levene’s Test of homogeneity of variance of ESE scores with respect to involvement of mother in business	208
Table 5-72: Two way Mixed Design ANOVA results for entrepreneurship education and involvement of mother in business	208
Table 5-73: Difference in ESE based on involvement of mother in business for EMBA prospects and graduates.....	210
Table 5-74: Difference in ESE based entrepreneurship education participants with and without involvement of mothers in business.....	210
Table 5-75: Descriptive statistics of ESE of EMBA prospects and graduates with respect to interaction with mothers about business	211
Table 5-76: ANOVA results for difference in ESE based on level of interaction with mother about business	212
Table 5-77: Descriptive statistics of ESE of EMBA prospects and graduates with respect to involvement of siblings in business	212
Table 5-78: Test of normality of ESE scores with respect to siblings involved in business	213
Table 5-79: Levene’s Test of homogeneity of variance of ESE scores with respect to involvement of siblings in business	213
Table 5-80: Two way Mixed Design ANOVA results for entrepreneurship education and involvement of siblings in business	213
Table 5-81: ANOVA : Difference in ESE based on involvement of siblings in business for EMBA prospects and graduates.....	215
Table 5-82: ANOVA : Difference in ESE based on entrepreneurship education participants with and without involvement of siblings in business	215
Table 5-83: Descriptive statistics of ESE of EMBA prospects and graduates with respect to interaction with siblings about business.....	216
Table 5-84: ANOVA results for difference in ESE based on level of interaction with siblings about business	217

Table 5-85: Descriptive statistics of ESE of EMBA prospects and graduates with respect to involvement of close friends in business	217
Table 5-86: Test of normality- ESE scores with respect to close friends involved in business	218
Table 5-87: Levene’s Test of homogeneity of variance of ESE scores with respect to involvement of close friends in business	218
Table 5-88: Two way Mixed Design ANOVA results for entrepreneurship education and involvement of close friends in business	218
Table 5-89: ANOVA : Difference in ESE based on involvement of close friends in business for EMBA prospects and graduates.....	221
Table 5-90: ANOVA : Difference in ESE based entrepreneurship education participants with and without involvement of close friends in business	221
Table 5-91: Descriptive statistics of ESE of EMBA prospects and graduates with respect to interaction with close friends about business.....	222
Table 5-92: ANOVA results for difference in ESE based on level of interaction with close friends about business	223
Table 5-93: Post-hoc ANOVA-Tukey Test for difference in ESE based on level of interaction with close friends about business.....	223
Table 5-94: Descriptive statistics of ESE of EMBA prospects and graduates with respect to involvement of relatives in business	224
Table 5-95: Test of normality of ESE scores with respect to relatives involved in business	225
Table 5-96: Levene’s Test of homogeneity of variance of ESE scores with respect to involvement of relatives in business	225
Table 5-97: Two way Mixed Design ANOVA results for entrepreneurship education and involvement of relatives in business	225
Table 5-98: ANOVA : Difference in ESE based on involvement of relatives in business for EMBA prospects and graduates.....	227
Table 5-99 : ANOVA for influence of entrepreneurship education on ESE of participants with and without relatives in business	227
Table 5-100: Descriptive statistics of ESE of EMBA prospects and graduates with respect to interaction with relatives about business	228
Table 5-101: ANOVA results for difference in ESE based on level of interaction with relatives about business	229
Table 5-102: Post-hoc ANOVA-Tukey Test for difference in ESE based on level of interaction with relatives about business.....	230
Table 5-103: Descriptive statistics of ESE of EMBA prospects and graduates with respect to involvement in business	230
Table 5-104: Test of normality of ESE scores with respect to involvement in business.....	231
Table 5-105: Levene’s Test of homogeneity of variance of ESE scores with respect to involvement in business	231

Table 5-106: Two way Mixed Design ANOVA results for entrepreneurship education and involvement in business	232
Table 5-107: ANOVA : Difference in ESE based on involvement in business for EMBA prospects and graduates	233
Table 5-108: ANOVA : Difference in ESE based entrepreneurship education participants with and without involvement in business	234
Table 5-109: Descriptive statistics of ESE of EMBA prospects and graduates with respect to level of involvement in business.....	235
Table 5-110: Test of normality-ESE scores with respect to level of involvement in business ..	236
Table 5-111: Levene’s Test of homogeneity of variance of ESE scores with respect to level of involvement in business	236
Table 5-112: Two way Mixed Design ANOVA results for entrepreneurship education and level of involvement in business.....	237
Table 5-113: ANOVA : Difference in ESE based on level of involvement in business for EMBA prospects and graduates	239
Table 5-114: ANOVA : Difference in ESE of EMBA graduates and prospects with different levels of involvement in business	239
Table 5-115: Post-hoc ANOVA-Tukey Test for difference in ESE based on level of involvement in business	240
Table 5-116: Descriptive statistics of ESE of EMBA prospects and graduates with respect to prior work experience	241
Table 5-117: Test of normality of ESE scores with respect to prior work experience	242
Table 5-118: Levene’s Test of homogeneity of variance of ESE scores with respect to prior work experience	242
Table 5-119: Two way Mixed Design ANOVA results for entrepreneurship education and prior work experience	243
Table 5-120: ANOVA : Difference in ESE based on prior work experience for EMBA prospects and graduates.....	244
Table 5-121: ANOVA : Difference in ESE of EMBA graduates and prospects with and without prior work experience	245
Table 5-122: Descriptive statistics of ESE of EMBA prospects and graduates with respect to duration of prior work experience.....	246
Table 5-123: Test of normality-ESE scores with respect to duration of prior work experience	247
Table 5-124: Levene’s Test of homogeneity of variance of ESE scores with respect to duration of prior work experience	247
Table 5-125: Two way Mixed Design ANOVA results for entrepreneurship education and duration of prior work experience.....	247
Table 5-126: ANOVA : Difference in ESE based on duration of prior work experience for EMBA prospects and graduates.....	249

Table 5-127: ANOVA : Difference in ESE of EMBA graduates and prospects with varying duration of prior work experience.....	249
Table 5-128: Descriptive statistics of ESE of EMBA prospects and graduates with respect to prior work experience	251
Table 5-129: Test of normality of ESE scores with respect to prior entrepreneurial experience	251
Table 5-130: Levene’s Test of homogeneity of variance of ESE scores with respect to prior entrepreneurial experience	252
Table 5-131: Two way Mixed Design ANOVA results for entrepreneurship education and prior entrepreneurial experience	252
Table 5-132: Difference in ESE based on prior entrepreneurial experience for EMBA prospects and graduates.....	254
Table 5-133: Difference in ESE based on entrepreneurship education for those with and without prior entrepreneurial experience	254
Table 5-134: Descriptive statistics of ESE of EMBA prospects and graduates with respect to duration of prior work experience.....	255
Table 5-135: Test of normality of ESE scores with respect to duration of prior entrepreneurial experience	256
Table 5-136: Levene’s Test of homogeneity of variance of ESE scores with respect to duration of prior entrepreneurial experience	256
Table 5-137: Two way Mixed Design ANOVA results for entrepreneurship education and duration of prior entrepreneurial experience.....	256
Table 5-138: Difference in ESE based on duration of prior entrepreneurial experience for EMBA prospects and graduates	259
Table 5-139: ANOVA : Difference in ESE of EMBA graduates and prospects with varying duration of prior entrepreneurial experience.....	259
Table 5-140: Parameters with significant difference in ESE of EMBA vs RMBA graduates ...	262
Table 5-141: Parameters with no significant difference in ESE-EMBA vs RMBA graduates ..	267
Table 5-142: Comparison of ESE of EMBA and RMBA graduates, EMBA graduates and prospects, RMBA graduates and prospects.....	273
Table 5-143: Tasks with and without significant influence of EMBA and RMBA	276
Table 5-144: Findings: Role of gender in influencing ESE of respondents	278
Table 5-145: Findings: Role of number of parents involved in business in influencing ESE of respondents.....	279
Table 5-146: Findings : Role of involvement of parents, siblings, friends and relatives in influencing ESE of respondents.....	281
Table 5-147: Findings : Role of interaction with parents, siblings, friends and relatives in influencing ESE of respondents.....	285
Table 5-148: Findings : Role of prior involvement in business in influencing ESE of respondents.....	288

Table 5-149: Findings: Role of level of prior involvement in business in influencing ESE of respondents.....	289
Table 5-150: Findings: Role of prior work experience in influencing ESE of respondents.....	290
Table 5-151: Findings: Role of duration of prior work experience in influencing ESE of respondents.....	291
Table 5-152: Findings: Role of entrepreneurial experience in influencing ESE of respondents	293
Table 5-153: Findings: Role of duration of prior entrepreneurial experience in influencing ESE of respondents	294
Table 6-1: Findings from interviews of entrepreneurship alumni: extent of helpfulness of entrepreneurship education.....	300
