

Acknowledgements

Pursuing research work in Mathematics has been my life long ambition .

I thank the management of Navrachana University, who started the research programme in Mathematics with an inspiring philosophy of “reinventing higher education through an interdisciplinary focus that unites disciplinary interests to create a rich and synergistic educational experience” and giving me an opportunity to join the university.

I thank my guide and mentor, Dr.Lipika Mazumdar, Navrachana University for giving me an opportunity to work under her supervision and for her continuous support and guidance in my journey. Her immense knowledge in mathematics, zeal and enthusiasm to share that knowledge with her students have been an inspiration. She has enriched my knowledge with her valuable guidance and our extensive discussions regarding my work have enhanced my ideas. I express my deep gratitude to her for accepting the challenge to provide me her valuable guidance in fulfilling the course objectives, especially as I had a significant time gap since I finished my Masters education in Mathematics.

I also extend my sincere gratitude to Dr. Jaitha Sharma, Dr.Salma Pirzada and Prof.Snehal sir for their helpful comments, co-operation, and constant encouragement to go forward.

I thank Dr.Mandira Sikdar for her support, co-operation and guidance. Also, I thank Dr.Pallavi Ghalsasi, and Dr.Payal Desai for their valuable suggestions.

I like to acknowledge and thank my parents because of whose upbringing, I developed the will and perseverance to go against the tide to gain higher education in the subject, I have a passion for. I express my gratitude to my mother who inspired me to take up Mathematics and also for the sacrifices she made for my education.

I also express my sincere gratitude to my husband, daughter and son who encouraged, supported, motivated and stood by me throughout this journey.
