

## List of Figures

Chapter	Figure number	Title	Page number
<b>1.</b>	1.1	<i>Butea monosperma</i> Leaf and bark	2
	1.2	<i>Melia azedarach</i> L. Plant	3
	1.3	<i>Saraca asoca</i> (Roxb.) Wild. Plant	4
	1.4	<i>Solanum virginianum</i> L. Plant	5
	1.5	% Yield of extract	21
	1.6	Total phenol estimation	25
	1.7.1	Total flavonoid estimation	26
	1.7.2	Anti-oxidant assay: The anti-oxidant properties of plant extracts were evaluated by performing DPPH assay	27
<b>2.</b>	2.3.1	Anti-proliferative activity: IC <sub>50</sub> (µg/mL) of <i>Bm</i> , <i>Sa</i> , <i>Ma</i> and <i>Sv</i> plant parts' aqueous extracts on MCF-7 for the treatment of 24 hr,48 hr and 72 hr	40
	2.3.2	Anti-proliferative activity determination: IC <sub>50</sub> (µg/mL) of <i>Bm</i> , <i>Sa</i> , <i>Ma</i> and <i>Sv</i> plant parts' aqueous extracts on MDA-MB-231 for the treatment of 24 hr,48 hr and 72 hr	41
	2.3.3	Anti-proliferative activity: IC <sub>50</sub> (µg/mL) of <i>Bm</i> , <i>Sa</i> , <i>Ma</i> and <i>Sv</i> plant parts' methanolic extracts on MCF-7 for the treatment of 24 hr,48 hr and 72 hr	42

	2.3.4	Anti-proliferative activity: IC <sub>50</sub> (µg/mL) of <i>Bm, Sa, Ma</i> and <i>Sv</i> plant parts' methanolic extracts on MDA-MB-231 for the treatment of 24 hr, 48 hr and 72 hr.	43
	2.3.5(A)	Anti-proliferative activity of <i>Sv</i> plant extracts on Human breast cancer cell line MCF-7. (aqueous extract)	44
	2.3.5(B)	Anti-proliferative activity of <i>Sv</i> plant extracts on Human breast cancer cell line MCF-7. (methanolic extract)	
	2.3.6(A)	Anti-proliferative activity of <i>Sv</i> plant extracts on Human breast cancer cell line MDA-MB-231.(aqueous extract)	45
	2.3.6(B)	Anti-proliferative activity of <i>Sv</i> plant extracts on Human breast cancer cell line MDA-MB-231.(methanolic extract)	
	2.3.7(A)	Cytotoxic evaluation of <i>Sv</i> plant extracts on HEK-293.(aqueous extract)	46
		Cytotoxic evaluation of <i>Sv</i> plant extracts on HEK-293.(methanolic extract)	
<b>3.</b>	3.3.1	HR LC-MS/MS Chromatogram of <i>Sv</i> leaf aqueous extract	58
	3.3.2	HR LC-MS/MS Chromatogram of <i>Sv</i> leaf methanolic extract	58
<b>4.</b>	4.3.1	Images represents the interaction between Target Cyclin D1, Cyclin-D4,CDK4 and CDK6 with ligand Ritterazine A.	73
	4.3.2	Images represents the interaction between Target p18,p21 and p27with ligand Ritterazine A.	74

	4.3.3	Images represents the interaction between Target Bax,Bak,Bcl-2 and Bcl-xl with ligand Ritterazine A.	75
	4.3.4	Images represents the interaction between Target caspase-3 and caspase-9 with ligand Ritterazine A.	76
<b>5.</b>	5.1.1	Structure of Melatonin	83
	5.3.1	Anti proliferative effect of melatonin has shown dose dependent reduction in % cell viability in MCF-7 and MDA-MB-231 cells.	86
	5.3.2 (A-D)	Anti-proliferative activity of melatonin in combination with <i>Sv</i> leaf extracts at IC <sub>50</sub> (µg/mL) combinational group.	88
<b>6.</b>	6.3.1	Cell morphology study of untreated and treated experimental groups of MCF-7 through inverted microscope.	102
	6.3.2	Cell morphology study of untreated and treated experimental groups of MDA-MB-231 through inverted microscope.	102
	6.3.3	Present images shows the cell migration in wound area for MCF-7 cell line in different groups.	104
	6.3.4	Scratched area % determined the cell migration inhibition activity in MCF-7 cell lines.	104
	6.3.5	Present images shows the cell migration in wound area for MDA-MB-231 cell line in different groups.	105

6.3.6	Scratched area % determined the cell migration inhibition activity in MDA-MB-231 cell lines.	105
6.3.7	Colony formation determination for MCF-7.	106
6.3.8	Graphical representation of colony formation % in MCF-7.	106
6.3.9	Colony formation determination for MDA-MB-231.	107
6.3.10	Graphical representation of colony formation % in MDA-MB-231.	107
6.3.11	Agarose gel image of DNA fragmentation assay for experimental groups of MCF-7.	108
6.3.12	Agarose gel image of DNA fragmentation assay for experimental groups of MDA-MB-231.	108
6.3.13	Nuclear morphology observational images of MCF-7 stained with DAPI (Magnification x400) using florescence microscope.	109
6.3.14	Nuclear morphology observational images of MDA-MB-231 cells stained with DAPI (Magnification x400) using florescence microscope.	109
6.3.15	Flow cytometer analysis images for MCF-7 experimental groups.	110
6.3.16	Flow cytometer analysis images for MDA-MB-231 experimental groups.	111
6.3.17	Graphical representation of Flow cytometer analysis of MCF-7 experimental groups.	112

	6.3.18	Graphical representation of Flow cytometer analysis of MDA-MB-231 experimental groups.	112
7.	7.3.1	Gene expression study of <i>BAX</i> and <i>BCL2</i> of MCF-7 experimental groups using real time PCR.	125
	7.3.2	Gene expression study of <i>CASP3</i> , <i>CASP8</i> and <i>CASP9</i> of MCF-7 experimental groups using real time PCR.	126
	7.3.3	Gene expression study of <i>MMP2</i> and <i>MMP9</i> of MCF-7 experimental groups using real time PCR.	127
	7.3.4	Gene expression study of <i>IL4</i> and <i>IL10</i> of MCF-7 experimental groups using real time PCR.	128
	7.3.5	Gene expression study of <i>BAX</i> and <i>BCL2</i> of MDA-MB-231 experimental groups using real time PCR.	132
	7.3.6	Gene expression study of <i>CASP3</i> , <i>CASP8</i> and <i>CASP9</i> of MDA-MB-231 experimental groups using real time PCR.	133
	7.3.7	Gene expression study of <i>MMP2</i> and <i>MMP9</i> of MCF-7 experimental groups using real time PCR.	134
	7.3.8	Gene expression study of <i>IL4</i> and <i>IL10</i> of MCF-7 experimental groups using real time PCR.	135
	7.3.9	PPI network analysis using Cytoscape 10.1 software.	185
	7.3.10	Identification of hub genes from PPI network using Cytoscape plugins Cytohubba.	186
