Availability and Usage of Toilets in Area of Vadodara District

MSW Jr.

Navrachana University

Vadodara

Abstract

Corporate Social Responsibility (CSR) can be a way of contributing to systematic social changes in which investments can produce social benefits in the areas of town planning, sanitation, cleanliness, waste management, hygiene etc. Therefore the original concept of social responsibility involving the maximization of profits has been modified. These were carried out by the corporate for their employees and/or for the purpose of the villages created by the company where their employees resided. These corporate are also interested in keeping their premises and surroundings neat and clean under the concept of Green environment. This research is an effort of Master of Social Work (MSW) Jr. a view of creating a thought and later on implementing in an actual manner so that Swachh Bharat Abhiyan launched by Government of India this year, can be a reality for the future. Adopting the seed planted by Prime Minister of India, we have led the way towards maintenance of a clean environment by constructing and renovating sanitation facilities in various project areas.

Current research focuses on work taken up as CSR activity by many agencies. One of the major tasks is construction of toilets. The basic objective was to study Availability and Usage of Toilets in Vadodara District tools used were semi structured interview schedule and observations. Findings reveal open defecation free India is a distant reality.
