Preface

Glossary of Terms

Chapter I

Introduction

1.	Introduction	1
1.1.	Microemulsions.....	3
1.1.1.	Types of microemulsion systems.....	5
1.1.2.	Oil-in-water microemulsion system.....	5
1.1.3.	Water-in-Oil microemulsion system.....	6
1.1.4.	Bicontinuous microemulsion system	7
1.1.5.	Winsor phases in a microemulsion system	7
1.1.6.	Phase diagrams of microemulsion system	10
1.1.7.	Microemulsions with non-ionic surfactants.....	11
1.1.8.	Microemulsions with ionic surfactants	13
1.2.	Applications of microemulsion systems	15
1.3.	Room temperature Ionic Liquids (RTILs)	17
1.3.1.	History of Room temperature Ionic Liquids (RTILs).....	17
1.3.2.	Advantages of Room Temperature Ionic Liquid (RTILs)	20
1.3.3.	Synthesis of Room Temperature Ionic Liquid (RTIL), Ethylammonium nitrate [EAN].....	21
1.4.	Surfactants.....	22
1.4.1.	Classifications of Surfactants	23
1.4.1.1	Anionic surfactants (negatively charged)	23
1.4.1.2	Cationic Surfactants (positively charged).....	23
1.4.1.3	Amphoteric or Zwitterionic Surfactant (both positively and negatively charged).....	24

1.4.1.4	Non-ionic surfactant (No Charge)	25
1.4.1.5	Alkyl Polyglycoside non-ionic sugar-based surfactants	26
1.5.	Materials and Methods	27
1.5.1.	Materials.....	27
1.5.2.	Experimental techniques	29
1.5.2.1	Construction of Phase diagrams for microemulsion formulation	29
1.5.2.2	Polarization Microscopy.....	32
1.5.2.3	Electrical conductivity measurements.....	32
1.5.2.4	Solubilization of dye using microemulsions	32
1.5.2.5	Metal Extraction and Recovery using microemulsions.....	35
1.6	Scope of the Present work	37
1.7	References.	38

Chapter II

Studies on the hydrophobic ionic liquid with sugar-based non-ionic surfactant microemulsions: phase behaviour and microstructure

2.1	Introduction.....	59
2.2	Materials and methods.....	63
2.3	Results and discussion	67
2.4	Conclusions	81
2.5	References	82

Chapter III

Hydrophobic ionic liquid/ sugar surfactant/water microemulsions: effect of mass fraction of ionic liquid (α) as well as the effect of co-surfactant

3.1	Introduction	89
3.2	Materials and methods.....	91
3.3	Results and Discussion.....	92
3.4	Conclusions	104
3.5	References	106

Chapter-IV

Microemulsion with room-temperature ionic liquid as a polar phase: effect of variation in surfactant amphiphilicity and oil length111

4.1. Introduction	111
4.2. Materials and methods.	115
4.3. Results and Discussion.....	117
4.4. Conclusions.....	129
4.5. References	130

Chapter V

Applications of the micromulsion systems136

5.1 Solubilization of hydrophobic lysochrome organic dye	136
5.1.1 Introduction.....	136
5.1.2 Materials and methods	138
5.1.3 Results and Discussion	138
5.1.4 Conclusions.....	141
5.2 Extraction and efficient Recovery of metal ions.....	142
5.2.1 Introduction.....	142
5.2.2 Material and methods.....	144
5.2.3 Results and discussion	147
5.2.4 Conclusions.....	152

Chapter VI

Summary159

Appendix I-XXIII

Details of Credit and Research Progress Seminars

List of Published Research Papers

Research Papers Presented in National/ International Conferences

Reprints of Published Research Articles
