

## List of Table

Chapter	Table Number	Title	Page Number
<b>I</b>	Table 1.	A quick comparison of organic solvents with ionic liquids.	20
	Table 2.	Chemical component used in the present thesis.	27-29
<b>II</b>	Table 1.	Characteristic parameters of the constructed Phase diagrams.	69
	Table 2.	Characteristic parameters of the constructed Phase diagrams.	72
	Table 3.	Characteristic parameters of the constructed Phase diagrams.	80
<b>III</b>	Table 1.	Characteristic parameters of the constructed Phase diagrams.	95
	Table 2.	Characteristic parameters of the constructed Phase diagrams.	98
	Table 3.	Characteristic parameters of the constructed Phase diagrams.	100
	Table 4.	Characteristic parameters of the constructed Phase diagrams.	104
<b>IV</b>	Table 1.	The database on microemulsion formulated using conventional non-ionic surfactant/polar ionic liquid/oil.	113
	Table 2.	Properties of the sugar-based non-ionic surfactants utilized for formulation of microemulsion system.	116
	Table 3.	Distinctive parameters of the phase diagrams ( $T$ - $\gamma$ section) constructed for a ternary microemulsion formulation.	121
	Table 4.	Distinctive parameters of the phase diagrams ( $T$ - $\gamma$ section) constructed for a ternary microemulsion formulation.	127-128
<b>V</b>	Table 1.	Characteristic parameters of the constructed Phase diagrams.	148
