

Acknowledgement

At first place I would like to thank the Almighty, who has guided, protected, blessed, and help me at every stage of my life, for giving me the strength and patience to work relentlessly all these years so that today I can stand proud with my head held high. Without God's grace, this achievement would not have been possible.

At this moment of accomplishment, first I want to express my deep sense of heartfelt gratitude to my research supervisor Dr. Amarish Badgujar, for his inspiring, splendid and authentic guidance, moral support and constant encouragement throughout my research work. His passion and dedication towards research have stimulated, provoked and facilitated me to complete this endeavor. I could not have imagined having a better research supervisor and mentor for my Ph.D. study. His role will always remain fundamental in shaping my future. I am thankful for the support and liberty that he provided me to develop an attitude of independent scientific thinking, for keeping faith in me and accepting me as a research student. His dynamic thinking, invaluable suggestions and encouragement at the difficult times have led to the successful accomplishment of this thesis. Under his guidance, I successfully overcame many difficulties and learned a lot. He has always made himself available to clarify my doubts despite his busy schedules and I consider it as a great opportunity to do my doctoral program under his guidance and to learn from his research expertise. This thesis would not have been possible without his extraordinary support.

I take this opportunity to sincerely acknowledge my research committee members: Dr. Kedar Pathak, Dr. Kaushik Patel, Mr. Vishal Tailor and Dr. Mandira Sikdar-Program Chair-Ph.D. Navrachana University, who have been kind and considerate to offer me their time and suggestions during the course of the doctoral studies to exalt the quality of my research work. I warmly thank Professor, The Provost, Dr. Nilay Yajnik, The Registrar, Dr. Sandeep Vasant, and Shri Rajesh Talati, Ex-Registrar, Navrachana University and Management of Navrachana University for providing me all the required facilities to carry out my research work. I am grateful to all teaching and non-teaching staff of Department, for providing a stimulating and pleasant atmosphere.

I would like to acknowledge Dr. Nilesh Ghetiya, Associate professor, Mechanical Engineering Department, Institute of Technology, Nirma University for his continuous support and guidance. I am also grateful to Dr. Vishvesh Badheka, Mechanical Engineering Department,

School of Technology, Pandit Deendayal Energy University (previously Pandit Deendayal Petroleum University) for support and providing facility for experimentation and characterization.

I am grateful to my colleagues, Faculty members at Navrachana University, Dr. Hiral Parikh, Ms. Dipali Pandya, Mr. Adil Khan, Sagar Bhai, Late. Aarekar Dada for their help whenever needed throughout the Ph.D journey. I would like to thank my parents and family members for allowing me to realize my own potential. All the constant moral support, affection and care they have provided me over the years was the greatest gift, without which I would not have been able to complete this doctoral thesis. It was their kindness and patience that they allowed my absence from my family duties. I have no words to express my sincere gratitude to my beloved father Mr. Ketan Y. Parikh, mother Ms. Kashmira K. Parikh, loving sister Ms. Pooja K. Shah for their untiring support towards my carrier and life. They brought me up with unconditional care, love, support, inspiration blessings and mould my life with good civilized nature for better society. I feel much obliged to my father and mother for all the troubles they have taken to give me the best possible education to achieve my dream. I am heartily thankful to one who always stood by side, my beloved wife, Ms. Isha V. Parikh, for his unrelenting and unconditional support during the pursuit of Ph.D that made the completion of thesis possible. You were always around to help keep things in perspective. I greatly value your love, contribution and belief in me.

Viren K. Parikh
