Abstract :

This paper is an attempt to study the influence of School Van Drivers that may turn as a Major Change Factor to Maintain TQM in school. It is a theme cum research paper. The objective is to study the role of school van drivers as a major and important human resource and to maintain the day today activities in school. It can be achieved by assigning planned work. The van drivers are the major work force which could be utilized through an innovative way. The sample consisted of 125 van drivers from L P.Savani Group Of Schools are the base for this project. All the drivers were the part of this pilot project. The process experiment with these drives brought amazing results in a very practical way.

It has been observed that if the scientific approach towards this untouched area is studied with enthusiasm and by providing motivation, it can surely help to practice Total Quality Management in educational institution.
